

Sergeant Guided Missile, Redstone Arsenal

SERGEANT GUIDED MISSILE

REDSTONE ARSENAL, HUNTSVILLE, ALABAMA

Measuring about 30 feet in length, the Army's Sergeant is a surface-to-surface, solid propellant, ballistic guided missile possessing a very high degree of reliability and accuracy. Also highly mobile, it can be quickly emplaced and fired by a very small crew, under all conditions of weather and terrain, delivering a nuclear blow far behind enemy lines. Its highly accurate guidance system is invulnerable to any known means of enemy counter-measures.
