History

Redstone Arsenal celebrated its 50th anniversary on April 4, 1991. The arsenal was established in 1941 as the Army's first missile development center. It was originally known as the Army Ordnance Center and later as the Army Ordnance Depot. The arsenal's name was changed to Redstone Arsenal in 1963. The arsenal is located in Huntsville, Alabama, and is one of the largest and most advanced military arsenals in the world. It is home to a wide variety of military equipment, including missiles, rockets, and space vehicles. The arsenal is also a major center for research and development in the field of space technology.

The arsenal's history is filled with significant events and milestones. In 1941, the Army Ordnance Center was established to develop and test the Army's first missile, the Redstone missile. The missile was developed by the Army Ordnance Center and was the first American missile to be launched into space. In 1945, the Army Ordnance Center was renamed the Army Ordnance Depot. In 1963, the Army Ordnance Depot was renamed Redstone Arsenal. The arsenal's name was changed to reflect its role as a major center for research and development in the field of space technology. The arsenal is home to a wide variety of military equipment, including missiles, rockets, and space vehicles. The arsenal is also a major center for research and development in the field of space technology.

The arsenal's history is filled with significant events and milestones. In 1941, the Army Ordnance Center was established to develop and test the Army's first missile, the Redstone missile. The missile was developed by the Army Ordnance Center and was the first American missile to be launched into space. In 1945, the Army Ordnance Center was renamed the Army Ordnance Depot. In 1963, the Army Ordnance Depot was renamed Redstone Arsenal. The arsenal's name was changed to reflect its role as a major center for research and development in the field of space technology.
