The fort site at Sulphur Trestle is located seven miles north of Athens, Alabama, on the Louisville and Nashville railroad line. The fort is south of Sulpher Creek and just west of the train tracks. About four hundred yards of trenches still remain and are in reasonable good condition. The fort and the houses were burned by General Nathan Bedford Forrest after the fort was surrendered to him. In 1864 the fort was a square redoubt about 70 yards long on each side. The parapet was built of logs with several feet of hard-packed dirt on the outside. The fort was five or six feet high. A deep trench was dug around the parapet. Inside the fort were the powder magazine, officer's quarters, and sheds for supplies. South of the fort the enlisted men lived in tents. A historic/recreational park is planned for the site.	The fort site at Sulphur Trestle is located seven miles north of Athens, Alabama, on the Louisville and Nashville railroad line. FOUNDERS' HALL, Lms Co Ath Site #2 Athens College Campus

Founders' Hall was erected ca. 1842 on a site that had been purchased for a nominal consideration from the Maclin and Hobbs families of Athens. Plans for the structure were drawn by Hiram H. Higgins, local architect and builder; the woodwork was done under the guidance of Ira E. Hobbs; and the brick work under the superintendency of James M. Brundidge. It was constructed at a cost of about \$40,000.00, contributed by the citizens of Athens. This building was originally two stories with a gabled roof and fronted by four large Ionic columns. Its walls are solid brick masonry, two feet thick. Skilled slave labor was used in brick making and construction. In 1890 a third story was added by changing the roof line from a gabled to a hipped roof and adding dormer windows. Three wings have also been added as the College expanded.

in the possession of the family, reveals that the land was patented in 1818 by Joseph Johnson and that in 1837 he sold it to James M. Lane for \$10,000.00. This would indicate that a house of some means stood on the land. In 1848 James Lane married Eliza Peete. The present owner inherited this property from the Peete family. Based on the architect's review of this house, it has a number of outstanding features; one is the brick cornices; another is its separate front entrance; and another is the separate stairways leading to the second floor with no openings between the two upstairs rooms.

GARRETT HOUSE, Lms Co Site #4 Sec. 26, T4S, R4W

This Greek Revival house was built in 1859. One of its outstanding features is the elaborate Victorian plaster work on the ceiling in the parlor. This is a two story clapboard house, originally containing two rooms upstairs and downstairs with wide halls between them. The present owner, Edmond Peter Garrett, who is the great great grandson of Governor Thomas Bibb, inherited the plantation on which the house stands. He and his two sons are considered successful modern planters who also maintain the traditions of their forebears.

Jones, the original builder, never completed it because of financial difficulties incurred during the Civil War. Previous to this date, Haywood Jones had become a wealthy planter of Limestone County, and married Sally Collier, a niece of Governor Collier of Alabama and a descendent of Governor Spottswood, an early Governor of Virginia. The next owners, Joshua P. Coman and son, James L., completed the plans of Haywood Jones and Mrs. Westmoreland, wife of Dr. Theo Westmoreland, the thrid owner, is responsible for adding the Victorian influence. The original plans for a ten room house were elaborate for that era. The rooms were large with high ceilings. The house contained a cupola, reached through a trap door, and was eighteen feet square. Dr. Coman and Dr. Westmoreland were leading physicians of their day. The house has changed hands many times since the death of Mrs. Westmoreland in the early 1900's and is in a deteriorated state.

MATTHEWS-ROWE HOUSE, Lms Co Site #6 SE Sec. 36, T3S, R4W Route 1, Tanner, Alabama (Huntsville Brown Ferry Road)

Luke Matthews, a large plantation owner, is credited with building this house in about 1830. He named it "Cotton Hill", maybe because cotton grew well in this area or perhaps for the cottonwood trees that grew there. He was born in Campbell County Virginia. He married Judith Peete, a daughter of an early settler of Limestone County. His second wife was Lucy Spottswood of Madison County. Although he moved to Madison County, he retained this property for a number of years. He sold it to John B. McClellan who served one term in the state legislature and was also Probate Judge of Limestone County. In 1879 he sold 212 acres of this plantation, including the homesite, to Andrew Jackson Rowe. It has remained in this family until recently. William Parham, a contractor who had built several homes in the Limestone area, is credited with building the house. He was exceptionally good at cabinet work and each door, mantel, and all the woodwork was said to have been handmade. Brick for the eighteen inch walls were made on the plantation.

PETTUS HOUSE, Lms Co Ath Site #7 202 Beaty Street, Athens, Alabama

This place, known as the Pettus house, appears to have been built between 1840 - 1855 and is considered of the latter Greek Revival style. Based on the architect's review, the appearance of the house is enhanced by the smaller proportioned windows on the second floor over the larger ones on the first floor. The two story boxed columned porch used on this house is indicative of the Greek Revival porches in Limestone County while in adjacent Madison County stuccoed round brick columned porches were almost standard. The hipped roof was unusual for this period. In 1963, the Pettus heirs sold the house to Athens College.

VINING-VASSER HOUSE Lms Co Ath Site # 8 301 Washington Street, Athens, Ala.

The first transfer of Lot 52, on which this house is located, was made from Robert Beaty and John D. Carriel, town developers, to Thomas Vining, a wealthy Limestone County planter. This transfer was made on April 17, 1826 and it is possible that Vining built the house prior to his death in 1830. When his estate was sold by the courts the property was bought by Joseph Wood on January 27, 1831. It remained in the Wood's family for a number of years and was then sold to Jonathan McDonald. He sold it within a year to Richard Vasser. It remained in the Vasser family until the 1940's. Richard Vasser was a prominent planter, merchant and banker who had been one of the early settlers of Limestone County. Based on the architect's review, this house is a typical example of late eighteenth century Georgian design built in the Federal period. An advertisement in the Limestone Register, a newspaper of that period, dated October 14, 1836, indicated that Joseph Wood wish to sell this "dwelling". He stated that Hiram Higgins, a prominent builder in Athens at the time, had built the structure. It is presently owned by Harold Lovvorn.

GILBERT HOUSE, Lms Co Site 12

Thomas P. McWilliams family home. We was probably built in 1840 - 1850. This house is Federal style two story clapboard house with "country" Greek Revival extended gable eaves and wide sash trim. According to architect's review, a Victorian porch was added in late nineteenth century and first floor sashes changed to two over two type used in latter nineteenth century. Upper floor sash is nine over nine. No windows are on second floor front a normal for log houses but unusual for clapboard houses of this size. Perhaps they were covered when the Victorian porch was added. There has been considerable addition made to the back.

MORRIS HOUSE, Lms.Co. Site #16 Sec. 26, T1S, R5W Elkmont, Alabama

This house was owned by a Legg family at one time. According to the architect's review, the design suggests construction date of 1840 - 1855 of this essentially Federal house; however, it has a Greek Revival portico. It has two story tapered boxed columns. The vertical proportions are awkwardly short. The upper sashes are three over six the only known in the area.

LUKE PRYOR HOUSE, Lms Co Site #17 Jefferson Street Athens, Alabama

The original part of the house was probably built ca. 1836. However, Luke Pryor, who bought the house in 1854, enlarged and remodeled the house in 1868. The house as it stands today gives the appearance of an Italianate. Victorian style. Luke Pryor was one of the prominent political figures of the state of Alabama. He served as both Congressman and Senator in the state legislature and filled the unexpired term in the United States Senate of George Houston in 1880. He refused to run for re-election. The house went out of the Pryor family at the death of his daughter, Miss Snow Pryor, in 1934. It is an apartment house at the present time.

Frances Cabaniss Roberts Collection

Preferred Citation: Frances Cabaniss Roberts Collection, Archives and Special Collections, M. Louis Salmon Library, University of Alabama in Huntsville, Huntsville, AL.

Collection Scope and Content: The Collection of 114 Linear ft. includes a total of 156 Archival Boxes. The Frances Cabaniss Roberts collection covers the historical records of the Cabaniss Roberts family. This collection contains extensive correspondence records of the Cabaniss Roberts family circa 1830 to 1930.

Archives/Special Collections Access Restrictions: None

Conditions Governing Use: This material may be protected under U. S. Copyright Law (Title 17, U.S. Code) which governs the making of photocopies or reproductions of copyrighted materials. You may use the digitized material for private study, scholarship, or research. Though the University of Alabama in Huntsville Archives and Special Collections has physical ownership of the material in its collections, in some cases we may not own the copyright to the material. It is the patron's obligation to determine and satisfy copyright restrictions when publishing or otherwise distributing materials found in our collections.

Provenance: Gift of Johanna Shields on October 28, 2006.
