speeches, keys to the city, historic sites and Old-Fashioned Bargain Days Downtown.

Saturday, April 19 is opening day, with a parade starting at Queen City Avenue and going to the old Capitol grounds along University Boulevard, featuring bands, floats, horses and horse-drawn carriages, antique autos, military units and members of the Spectacle cast in costume. Opening ceremonies will be held at a reviewing stand at the Old Tavern. The Mayor will then be host at a reception and luncheon at the University Club for visiting dignitaries, celebration officials and former residents. The annual pilgrimage of the Tuscaloosa Preservation Society to the outstanding homes in the city will begin that afternoon and continue during the following week.

A midway and fun zone will also open at the Junior High School and there will be a big entertainment on the first evening, which is still in the planning stage.

On Sunday most of the churches are planning their morning services around a theme of the development of the church and the community. A song festival is being planned for the afternoon, hopefully on Bryce Hospital Lawn.

Monday and Tuesday are "University Days." Since classes will not be dismissed, the activities centered on the campus will overlay the normal comings and goings of our concentrated and energetic population.

The Gorgas Shrine is being refurbished for the occasion and new exhibits added. The hostessing here will be taken over by the Amelia Gayle Gorgas chapter of the UDC. The President's Mansion will be opened from 1 to 4 p. m. both Monday and Tuesday. Garland Hall Art Gallery, which will be showing an exhibition of faculty work, will be on the tour for visitors, as will the Museum of Natural History. Paty Hall and the new Julia Tutwiler Hall are planning open house. On April 21, in the after-

noon several student organizations are going to put on an outdoor show, which could include an old-fashioned bathing suit beauty walk, among several creative ideas still stirring.

Tuesday, April 22 is Governor's Day. Governor Albert Brewer will arrive at mid-morning, be received with a 19-gun salute in front of the Coliseum, and after a short reception inside, review the Army and Air Force cadets from a reviewing stand facing the large area to the east of the Coliseum. The Governor will speak to a student convocation to which the public is invited.

On Wednesday evening, April 23 the big spectacle will open in the Memorial Coliseum: Tuscaloosa's historical pageant, "BLACK WARRIOR SAGA," presented by a cast of 500. This will run three nights and on each evening

before the performance there will be a different pre-pageant ceremony: first the presentation of the Sesquicentennial Queen and her royal court; then the judging of the Sesquicentennial Belles; and last the judging of the Brothers of the Brush.

Wednesday is "Business, Industry, Labor, Agriculture and Government Day"; Thursday, "Ladies Day"; Friday, "Youth Day"; and Saturday, "Men's Day". Activities appropriate to these categories will continue throughout the week. Some very distinguished speakers are expected for the luncheons and dinners on these days.

On Saturday morning the Sesquicentennial Time Capsule will be ceremoniously buried, marking an appropriate finale to the eight-day celebration.

SHARING THE RESOURCES

University and Auburn Offer Joint Graduate Programs

Joint programs in several areas of graduate study offered by both universities were announced in February by President Harry Philpott of Auburn University and President Frank Rose of the University of Alabama.

Under the new arrangement a student can pursue up to fifty per cent of his course work at either school in specific programs selected by faculty and administrative officers in both institutions. The agreement represents the first instance of this kind of cooperation in Alabama and in the Southeast, and is designed to permit greater flexibility for the student. It resulted from a two-year planning effort by the Graduate Councils in both universities.

Dean Eric Rodgers said that long hours of study and consultation were spent in the planning and establishment of the joint venture.

Graduate Dean W. V. Parker of Auburn University said that "the impact of this voluntary inter-institutional arrangement will be felt first within graduate programs in the field of education, but ultimately the joint program will cut across all lines of graduate education in the two institutions.

Examples of areas in education where the student might be able to take work in both institutions include master's or six-year degree programs in counseling and guidance, curriculum study and research, educational administration, educational psychology, special education, secondary education and supervision.

The graduate student's advisory committee in his home institution will determine the amount of coursework that may be taken by the student under the joint program in the other institution.

University and Stillman Share Libraries

University of Alabama students and Stillman College students now have access to libraries on both campuses through a cooperative program approved by the two institutions.

Students need only to present their identification cards to gain full access to the libra-

ies. Full access includes checking out books for purposes of reading or studying.

Plans for the cooperative program were worked out by Dr. David Mathews, Executive Vice-President of the University; Dr. Raymond F. McLain, Vice-President for Academic Affairs; Dr. Harold N. Stinson, President of Stillman College; Dr. W. Stanley Hoole, Dean of the Libraries at the University; and Miss Martha O'Rourke, Stillman College Librarian.

The two institutions plan to work together to avoid duplications of highly specialized periodicals and journals, in cases where one subscription would be sufficient for both campuses.

The cooperative program between the University and Stillman is similar to other agreements by the University with other four-year colleges in the state, including Judson College, Miles College, and Talladega College.

University and Miles College Co-operate

An \$8,783 contract with Miles College in Birmingham has been awarded to the University through an HEW Title III improvement grant, to provide services as a cooperating institution in academic affairs, administrative and fiscal operations and student affairs. This project is under the direction of Thomas A. McLeod, assistant dean for Student Development.

ADDING NEW COURSES

---in history

The Negro in the 20th Century is the title of the course being taught for the first time this spring semester in the history department. The instructor is visiting assistant professor Haywood L. Strickland from Stillman College.

A continuation of History 65 - The 18th and 19th Century Negro, taught by Dr. John Pancake last semester—the new course deals with the inter-relationship of the Negro and the industrial-urban environment of the United States, and attempts to show blacks in the whole context of America.

More than 85 students took Dr. Pancake's course last semester and there are 114 enrolled in Professor Strickland's classes.

--- in English

The English department has instituted a new course in Afro-American literature. Dr. O. B. Emerson is teaching these classes, which are concerned with an examination of the role of the Negro writer in American literature as a creator of literature and as a critical observer of the social and literary scene. The course attempts to evaluate the most significant Negro writers of fiction, drama, poetry and essays and to develop critical standards for the evaluation of literature with social significance. Readings are taken from the works of James Weldon Johnson, Ralph Ellison, Ishmael Reed, Richard Wright, James Baldwin, Louis Peterson, Lorraine Hansberry, LeRoi Jones, John Henrik Clarke and Arna Bontemps.

-- in training programs

A pilot education and training program in undergraduate education and certificate training programs in law enforcement and related areas were started here the beginning of the Spring semester.

Funds in the amount of \$37,600 have been granted to the University for use in the pilot program under the Omnibus Crime Control and Safe Streets Act and provide loans and grants for the students enrolled. Expansion of this program is expected.

Enrolled in the new certificate programs will be local policemen, correctional personnel and municipal employees, as well as graduate and undergraduate students.

The certificate program requires 30 hours of required and elective course work for completion. Students enrolled in the law enforcement program must be accepted as credit students and must meet all academic standards and regulations of the University. Loans and grants are available to students enrolled in the College of Arts and Sciences, School of Social Work, School of Law, College of Commerce and Business Administration and the College of Engineering.

--- in engineering

For the first time this semester the mineral engineering department is offering a course in environmental engineering problems. The course covers the entire field of physical en-

vironmental problems as related to the mineral mining and processing industries; air and water pollution and its prevention; solid and liquid waste disposal; land surface reclamation; and waste and scrap utilization. Specialized courses in some of these topics have been taught for several years but this may be among the first courses designed to cover a wide spectrum of topics. The purpose of the course is to make mining, petroleum and mineral processing engineers aware of the social and economic problems resulting from disturbance of the physical environment and of the solutions engineering may contribute. The course carries two semester hours credit and is being taught by Professor Reynolds Q. Shotts of the mineral engineering department.

Center Will Broaden Scope Of Economic Research

The Bureau of Business Research, a research-service agency which has been active since 1930 in the School of Commerce, has been retitled the Center for Business and Economic Research. It will have close ties to the newly established Graduate School of Business.

The Center, of which Professor Henry B. Moore is the director, will provide centralized support to research by faculty members and students and stimulate activity in the area of economic research, according to Commerce Dean Paul Garner.

The Bureau has served the State of Alabama for 38 years as the principal centralized source of information on the economy of the state and its growth. "Relationship of the Center to the business community will be the same, but the scope of its work will broaden," Professor Moore said. New emphasis will be given to cooperation between the Center and the Committee on Faculty Research in establishing policies that encourage faculty and student research and publication.

The Bureau has been responsible for two monthly publications, "Alabama Business" and "Alabama Retail Trade," and has published results of special studies. New projects currently being planned include a monograph series and a quarterly journal.

Team Effort In Cancer Research

A \$41,786 federal grant to the head of the biology department will help to underwrite a team effort in cancer research at the University. The grant buys radioisotopes, drugs, experimental animals (mice) and other supplies for Dr. Herbert S. Schwartz, department head and professor of biology, who is doing research on mitomycin, a drug developed in Japan and used in cancer treatment.

The object is to find out why the drug destroys healthy body cells as well as cancer cells and how to modify its attack so that it will preserve the healthy cells while destroying the cancer cells.

A group consisting of four biologists, one chemist and a medical doctor - all specialists in the field of cancer research - are now joining together with Dr. Schwartz in a team approach to certain problems of cancer. Dr. Schwartz, in emphasizing the value of a group effort in attacking the complexities of the subject, thinks that such a team effort is possible here because of the number of scientists and scholars who can share equipment, discuss problems and share vital technical knowledge.

Before accepting his post with the University, Dr. Schwartz was an associate member of the Sloan-Kettering Institute for Cancer Research and associate professor of pharmacology with the Sloan-Kettering Division of the Cornell University Graduate School of Medical Sciences.

Colleagues volunteering to lend their support and professional talents include:

-- Dr. John Mego, associate professor of biology, a biochemist who specializes in the fate of macromolecules injected into animals.

-- Dr. Bobby Moore, assistant professor of biology, a biochemist whose research specialty is ethionine and carcinogenesis (origin of cancer cells).

-- Dr. A. Wallace Hayes, assistant professor of microbiology, a biochemist who specializes in the chemistry and biology of the natural toxins of fungi in relation to cancer.

-- Dr. Frederick Gabrielson, assistant professor of biology, an ecologist trained in cancer research.

-- Dr. Rudolph A. Abramovitch, professor of chemistry, an organic chemist whose specialty is the synthesis of therapeutic agents.

-- Dr. Louis Brahen, director of the Department of Laboratories at Druid City Hospital, who specializes in pathology and the effects of drug treatment in cancer.

Dr. Schwartz pointed out that students make significant contributions because their questions remind the researchers of fundamentals and this helps to keep a continuing evaluation of the research process.

National Convention To Meet Here During Spring Holidays

The Intercollegiate Associated Women Students (IAWS) will hold their national convention on the Tuscaloosa campus April 2-6.

IAWS has never held a convention in the Deep South, and according to Yvonne Saliba, publicity chairman for the event, this convention of women student leaders is concerning itself for the first time with issues facing the entire nation rather than with strictly women's issues.

Broad use is being made of the University's resources in making the convention a really valuable one. More than fifty members of the University faculty and staff have given their time and talents toward organizing the groundwork for this national meeting, and many will participate in the convention itself. From nearly office and department committee advisors, workshop leaders, and convention planners are helping in the pre-convention preparation.

Mrs. Sarah Healey is national advisor to the group. Some of the members of the University community who are taking part are the following:

-- Dr. Edmund Miller has assisted in computerized convention research.

-- Mrs. Mary Martin and Miss Mae Carol Banks are working with housing the 1,000 delegates.

-- Reverend Emmett Gribbin is coordinating the Good Friday Service with Miss Lula Wall and Dr. John Sloan.

New Addition To Lyons-Harrison Research Building To Be Built

A \$917,000 grant from the National Institutes of Health has been awarded to the Medical Center to finance part of the construction of a \$5.4 million addition to the Lyons-Harrison Research Building.

Senators John Sparkman and James Allen of Alabama announced the award February 14.

The new 10-story addition will add 50,000 net square feet of floor space to the Center's research facilities, partially alleviating the overcrowded conditions which have prevailed for some time.

Nearly half of the addition will be devoted to cardiovascular research and training, a program which has developed extensively since the Medical Center received a major planning

grant for the development of a Cardiovascular Research and Training program from the NIH in 1967.

The NIH funds will be used to build and equip this portion of the addition.

The Institute of Dental Research and various other Medical Center departments will use the rest of the facilities in the new addition. Funds required to build these areas will be provided through University sources.

The new addition, the second to be made to the Lyons-Harrison Research Building, will be built between 7th and 8th Ave. South, facing 19th St. Construction should begin within two months, with completion slated for mid-1970.

Medical Center To Continue Summer Assistant Program For 1969

The Medical Center's Summer Assistant Program, which has provided opportunities for hundreds of young people to pursue scientific study and research during the summer months, is scheduled again for 1969.

For the high school seniors and college students selected as participants, the Summer Assistant Program is a unique experience. Each assistant pursues his or her research and study under the supervision and guidance of a Medical Center faculty member, and every effort is made to assign a student to an area in which he or she has particular interest.

Participants receive cash stipends of \$150 (high school seniors) and \$200 (college students)

per month for their study and work. Housing accommodations are available free of charge to out-of-town students.

The Summer Assistant Program is sponsored by the Medical Center Cancer Research Committee and is financially supported by the Alabama Chapter and national offices of the American Cancer Society.

Dr. Charles D. Kochakian, chairman of the Cancer Research Committee, asks that faculty members encourage promising students to apply for the program.

Notices of the program are being sent to every high school, junior college and college in Alabama.

School of Health Services Administration Awards Regional Technical Institute Contract

The contract for construction of the Regional Technical Institute for the Health Occupations has been awarded to the E. C. Coston Company of Birmingham. The Institute is a department of the UAB School of Health Services Administration.

A large portion of the funds for construction of the 50,000 square-foot building were made available to the UAB through a grant from the Appalachia Regional Commission. Consultants from the School Planning Laboratory, University of Tennessee, assisted in the early planning stages through a grant from Educational Facilities Laboratories, Inc., of New York.

James W. Truelove, Ed. D., director of the Institute, said that the RTI will be one of the first of its kind in the United States. Training will be at a post-high school, but sub-baccalaureate level. The RTI will work closely with junior colleges and other state institutions which offer training for health technicians.

Architect's rendering of the Regional Technical Institute for Health Occupations to be constructed in the Medical Center.

Training for RTI students in a number of technical specialties is already being conducted in interim classroom facilities in the Medical Center. Courses are offered for certified laboratory assistants, cytotechnologists and histologic technicians, electroencephalograph technicians, inhalation therapists, pathologist's assistants, radiologic technicians, and in anesthesia for nurses.

Enrollment is currently limited by a shortage of classroom and laboratory space.

It is estimated that 500 students per year will be enrolled in the RTI when the building is completed in January, 1970.

At that time, new RTI programs will be added for ambulance attendants, dental laboratory technicians, dietetic supervisors, dietetic technicians, occupational therapy assistants and physical therapy assistants.

The two-story RTI building will be located on the corner of 9th Avenue South and 17th Street South, near the Nursing Student's Residence. Indoor parking for 60 cars will be provided below the building's ground level.

Dr. Joseph Dixon Made AAO President

Dr. Joseph M. Dixon, clinical associate professor of ophthalmology and director of the Eye Pathology Laboratory, became the fifth president of the American Association of Ophthalmology during its recent annual meeting in Chicago.

He is a founding member of the AAO and served on the Board of Trustees, the Executive Committee, the House of Delegates and was chairman of the Home Study Course for Ophthalmic Medical Assistants.

mic Medical Assistants.

He was nominated president-elect of the Association in 1966.

Dr. Dixon is secretary and chairman of the Executive Committee, Birmingham Eye, Ear, Nose and Throat Society, was president of the Alabama Academy of Ophthalmology and Otolaryngology, and is immediate past-president of the Contact Lens Association of Ophthalmologists.

Tribute To Senator Lister Hill

One of the highlights of Alabama's 1969 Festival of Arts will be the unveiling of a bust of Senator Lister Hill of Alabama, a man whose name is virtually synonymous with health in America. The bust, created by the noted Italian sculptor Gualberto Rocchi of Milan, will be placed in the new Medical Center Library.

The Caduceus Club of the Medical College of Alabama and the Alumni Association of the University of Alabama School of Dentistry, together with other health professional groups, combined their resources to initiate the tribute to Senator Hill. Since this first step was taken, many friends of the Senator have asked to be included in the project, therefore, an invitation to contribute to the bust has been extended to all interested persons.

The opportunity to have the bust created by the famous sculptor arose when it was learned that Mr. Rocchi was visiting this country to attend the presidential inauguration of Richard Nixon. Rocchi had previously created a bust of Nixon.

Since the Festival is featuring a combined salute to Italy and to the healing arts, it was felt that a bust of Senator Hill, created by an Italian sculptor, would be a most appropriate combination.

Mr. Rocchi agreed to do the bust, and recently spent several days in Birmingham and Montgomery working on the clay model. From the clay, Rocchi will cast the bronze sculpture which is to be unveiled during the Festival.

Until the Medical Center's new Library is completed in 1970, the bust will be kept on display in the Center's Reynolds Historical Library.

Those who would like to contribute to this tribute to Senator Hill should forward their contributions to Dr. Paul Brann, vice president for financial affairs, University of Alabama in Birmingham.

As Senator Hill poses, sculptor Gualberto Rocchi deftly puts the finishing touches to the clay model from which the bronze bust will be cast.

New Grants

DR. WILLEM KLIP, professor of physiology and biophysics, has received a National Institutes of Health grant of \$26,408 in order to conduct investigations concerning the velocity of pressure waves. The award is for one year.

WALTER ROBBINS, program director of the graduate program in hospital administration, School of Health Services Administration, has received a one-year grant of \$27,498 from the Social and Rehabilitation Service to support teaching grants and traineeships in rehabilitation facilities administration.

DR. J. RUSSELL LINDSEY, professor and chairman of the Department of Comparative Medicine, has been awarded a National Institutes of Health grant of \$63,840 to support the first year of a two-year study of "Laboratory Animal Resources for Biomedical Research."

UAB Holds First Meeting Of Urban Council

Twenty-seven Birmingham citizens, invited by the UAB administration to serve on its proposed Urban Council, held an initial meeting at the campus on Jan. 31. Presiding at the meeting was Dr. Joseph F. Volker, UAB executive vice president.

The new Urban Council's function is to advise the UAB administrators on how the University's resources might best be used to meet the problems of the metropolitan area. The Council participants, representing major organizations and groups within the Birmingham community, include Dr. Raymond Christian, B. Roper Dial, John M. Fuller, W. Cooper Green, Emil Hess, Thomas W. Hooper, Emory O. Jackson, Robert Juster, Mrs. Alex Lacy.

Jack McSpadden, Albert L. Mills, B. A. Monaghan, Hugh Morrow, III, Charles A. Moss, Jr., Dr. John W. Nixon, George E. Rice, Dr. William H. Riheldaffer, George Rust, Mrs. John H. Schuler, Mayor George G. Siebels, Jr., The Rev. Nelson H. Smith, Jr., Mrs. Mervyn H. Sterne, Vincent Townsend, Barney Weeks, Louis J. Willie, Clarence N. Wood and Charles F. Zukoski, Jr.

In his letter of introduction to the Council, Dr. Volker said: "In recent years, universities have become increasingly aware of the need for and potential of their intimate involvement in urban affairs. The University of Alabama in Birmingham, as an urban institution, is very much interested in increasing its understanding of how it can assist the community to improve the quality of life in an urban area.

"To this end, we are proposing the formation of an Urban Council, broadly representative of the Birmingham metropolitan area and knowledgeable as to the problems and promise of the community. The Council's primary purpose will be to advise the UAB as to the utilization of its resources to meet the needs of an urban society. The UAB would benefit from your counsel in this very important matter."

Concentrated Course In Cancer To Be Held Annually

The first annual Lurleen B. Wallace Course in Cancer: Progress in Clinical Oncology, was held March 6 and 7 in the Veterans Administration Hospital Auditorium.

Designed to provide the latest information on the management of common medical problems, the Lurleen B. Wallace cancer program featured two guest clinicians: Dr. Charles M. Huguley, Jr., professor of medicine at Emory University School of Medicine, and Dr. Michael B. Shimkin, professor of medicine at Temple University School of Medicine.

Guest faculty collaborated with Medical College of Alabama faculty, who were responsible for eight lectures on specific areas of cancer therapy, in presenting sessions on the improvement of results and the rehabilitation and provision of relief to patients having difficult cancer problems.

Currently chairman of the Southeastern Cooperative Chemotherapy Study Group, Dr. Huguley lectured on Clinical Experiences with Combination Chemotherapy in Leukemia and Lymphoma, two specific types of cancers.

Dr. Shimkin, formerly chief of biometry and epidemiology and associate director for field studies of the National Cancer Institute, discussed The Problem of Breast Cancer, and lead the regularly scheduled grand rounds at University Hospital. He is presently editor of the medical journal *Cancer Research*.

During the program, Alfred W. Moffett, director of planning and assistant to the executive vice president of the University of Alabama in Birmingham, discussed progress made on planning for the Lurleen B. Wallace Cancer Institute and Hospital.

Sponsored by the Medical College's Division on Continuing Medical Education, the Department of Medicine and the Alabama Regional Medical Program, the cancer program is supported partially by a Clinical Cancer Training grant, the Alabama Regional Medical Program and the Merck Sharp and Dohme Postgraduate Program. Course coordinator is Dr. John R. Durant.

NEW DEAN OF FACULTY APPOINTED

Dr. John F. Porter, Jr. has been appointed Dean of Faculty at the University of Alabama in Huntsville, having assumed his duties in this newly created position March 1.

Dr. Porter has been associate professor of physics at UAH since 1966 and is presently chairman of the physics faculty and section head of the physics section in the Research Institute. He is also responsible for graduate students in physics.

Commenting on the appointment, Mr. Clyde Reeves, executive vice president for Huntsville Affairs, said, "This new position is required to provide overall direction to the growing academic programs and is in keeping with recommendations made by a distinguished committee that studies our development.

"Dr. Porter has established a most creditable record in assuming leadership responsibilities both academically and administratively. He is held in high esteem by his associates, and I am confident he will further the development of our academic programs."

Dr. Porter received the B.S. and M.S. degrees from the University of Alabama and the Ph.D. degree from The Johns Hopkins University. He is a member of the American Physical Society, the Optical Society of American, and president of the UAH Sigma Xi Club.

During the past decade he has been a researcher in solid state physics and spectroscopy. Before coming to UAH in 1966, Dr. Porter was research associate at The Johns Hopkins University. In 1961 he reported the first observation of quantum counter operation. Currently, he has been studying the role of energy transfer in the decay of excited states of rare earth ions as related to laser operation and performance.

He has made significant contributions to noted professional and technical journals during the past eight years. Most of his writings have dealt with quantum electronics.

The forty-one year old administrator is a native of Birmingham. His wife, Jacquelin Harbin Porter, is from Scottsboro, Alabama. They have five children - Gayle, 17, John, 15, Paul, 11, Adam, 8, and David, 6.

LIBRARY RECEIVES A VALUABLE GIFT

Through an arrangement made by Congressman Tom Bevill of the seventh district, the University of Alabama in Huntsville library has recently received a gift of some 4000 government documents. This valuable addition includes such treasures as 50 volumes

of Statutes at Large, beginning with volume one, 1789, and continuing through 1799; issues of the Congressional Globe, beginning with March, 1873, and of its successor, the Congressional Record; and many other items which will strengthen the library's resources for research.

M.S. IN CHEMISTRY TO BE OFFERED

Dr. Frank A. Rose has authorized the University of Alabama in Huntsville to award the master of science degree in chemistry. This increases to four the number of subjects in which Master's degrees are available at the Huntsville Campus - chemistry, engineering, mathematics, and physics.

This new curriculum will also permit interested students to satisfy all requirements for the Ph. D. degree in chemistry at Huntsville except completion in residence of a minimum of 18 semester hours of course work on the Tusca-

loosa campus. Similar programs already exist in engineering, mathematics, and physics.

Initiation of the master's program in chemistry in September, 1969, will coincide with the occupation of a new Science and Engineering building now under construction. New library and student union buildings will also be available in the fall. Having added four baccalaureate programs to the curricula during the past twelve months, the University now provides the undergraduate with degree opportunities in biology, chemistry, economics, engineering, English, history, mathematics, physics, and psychology. These developments materially improve the University's total instructional capability and assign the current year in the history of the UAH as one of marked expansion.

As a part of the expansion in chemistry, Dr. Merle T. Emerson, previously with Florida State University, will join the faculty in September as an Associate Professor of physical analytical chemistry. It is also anticipated that an organic chemist will be recruited before the start of the Fall Term.

mittee on Arts and Foundations and John Ross is chairman of the liaison with the U. S. Institute of Theatre Technicians; they both made reports. Dr. Bales conducted a panel on audience development. William Clifton conducted auditions for two children's plays to be produced for television by the University under a grant from the Carnegie Foundation and the U. S. government.

Scott Barr gave a seminar talk on the history of physics for the Department of Physics and Astronomy at the University of Florida at Gainesville, Feb. 28.

COMMERCE AND BUSINESS ADMINISTRATION

Paul Garner presented the January 13 program of the Druid Civitian Club. It was called Sidelights on a Visit to Russia.

Henry B. Moore attended a briefing session January 27-28 on the Appalachian Quick Query Data System, a joint effort of the Economic Development Administration and the Appalachian Regional Commission to establish computerized accessibility to economic, social and governmental operation data.

John C. Watkins, Jr. is the author of "White Collar Crime, The Forgotten Statistic" which appeared in the Birmingham News February 16 as part of the series, Perspective: the Campus View.

A. J. Penz has received an appointment from the U. S. State Department Agency of International Development to act as a consultant to the AID mission in Georgetown, Guyana, during March. Dr. Penz served as an AID consultant to small business firms in Lima, Peru. His new assignment is to work with owners and managers of business establishments in the development of information systems pertaining to financial accounting and product costing.

EDUCATION

Frederick L. Westover prepared an article called The Place of Phonics in the Preparation of Teachers of Reading, which was the basis of discussion at the twelfth annual Workshop in Reading Research held in Las Vegas April 1 in connection with the annual meeting of the American Personnel and Guidance Association.

Robert E. Griffin served as consultant to the Tuscaloosa City schools on Feb. 2, the Winston County counselors on Feb. 10, and to the counselors of Jefferson State Junior College Feb. 11. Dr. Griffin has received a \$10,000 planning grant from the U. S. Government under EPDA.

Margaret Coleman was one of the speakers at the Alabama Council on Family Relations meeting which was held at Auburn University Feb. 17-18. Dr. Coleman was recently re-elected secretary of the Family Counseling Service of Tuscaloosa.

Merilyn Jones served as music consultant for Franklin County Teachers' Association Feb. 7.

Yewell Thompson presented a short talk on PTA Milestones and Legislation at the City PTA Council Founders Day program Feb. 18 at Tuscaloosa High School auditorium.

Marjorie Swift spoke to the faculty of the School of Nursing, Druid City Hospital Jan. 30.

Grace Rockarts gave the second of two addresses to the In-Service meeting in Madison County, Feb. 7. On Feb. 10 she served as English consultant to the Winston County schools.

Dr. Gale Lambright was an invited participant in the International Symposium on Mental Retardation held in Madrid, Spain, March 18-20.

Ralph M. Roberts attended a planning conference of Directors of Counseling and Guidance Regional Centers and OE Staff in San Diego, Calif. Feb. 19-21.

J. Vernon Blackburn was in Raleigh, Feb. 24-26 to serve on an evaluation team for the North Carolina Board of Juvenile Correction.

As president of the Alabama State Association for Health, Physical Education and Recreation, George H. Stopp took part in the State President's Leadership Conference of AAHPER February 19 and 20.

Lou Wall attended the Southern District Association for Health, Physical Education and Recreation convention in Memphis, Tenn. Feb. 20-23, where she presided at the four meetings of the dance section. Miss Wall has served as chairman of the dance section of SDAHPER for the past year.

ENGINEERING

R. W. Killingsworth spoke at the January 27 meeting of the Tuscaloosa chapter of the American Business Women's Association. His talk was illustrated by colored slides of the College of Engineering.

Reynolds Q. Shotts spoke to the Mens Club of Hargrove Methodist Church Jan. 30 on the subject of what we have learned about the moon from Surveyor and Orbiter Probes.

E. J. Finnell, Jr. participated in the mid-winter conference of the Cooperative Education Division, ASEE, Jan. 21-23 by conducting a seminar on publicity.

W. G. Keith attended the Civil Engineering Department Heads meeting in New Orleans on Feb. 6 in connection with the National ASCE meeting on water resources.

G. P. Whittle recently presented a seminar entitled, Halogen Chemistry as Related to Public Health, at the School of Public Health on the Birmingham campus. Dr. Whittle's paper entitled Kinetic Studies of the Reaction of Aqueous Iodine with Organic Matter has been accepted for presentation at the American Chemical Society meeting in Minneapolis in April.

Henson K. Stephenson attended the annual Highway Research Board meeting held in Washington, D. C. Jan. 13-17.

LAW

Daniel J. Meador served on the State Bar Committee on the Revision of the Alabama Constitution and on the Committee on Continuing Legal Education at the State Bar meeting in Montgomery. Dean Meador, Vastine Stabler and Dallas Sands attended the meeting of the Council of the Alabama Law Institute, which was a part of the meeting of the Alabama Bar Association. As director of the Law Institute, Professor Stabler attended the meeting of the Council of Real Estate Probate and Trust section to discuss a possible role of the Law Institute in the Uniform Code project.

Thomas L. Jones attended a meeting of the Special Committee on the Uniform Code of the National Conference of Commissioners on Uniform State Laws in Seattle, Wash. Feb. 27-March 2.

Jay Murphy attended the 22nd national meeting of the annual conference of National Academy of Arbitrations at Colorado Springs in January.

Clinton McGee and Sam Beatty served on the committee on Defense of Indigent Defendants at the mid-winter meeting of the Alabama Bar Association on February 7.

Sam Beatty has been appointed a member of the Community Relations Council of Tuscaloosa by Police Chief William Marable.

Taylor Reveley attended the American Society of International Law regional meeting at the University of Virginia Feb. 28-March 1 where he was a member of the panel discussing The Power of the Executive to Use Military Force Abroad.

Rick Singer attended a conference on Institutional Racism in Atlanta, and conducted a workshop on student legal rights. He conducted a similar workshop at the N. S. A. conference in St. Louis.

Harry Cohen spoke at the Alabama Law Forum Dec. 11. On Feb. 7 he participated in the deliberations of the Committee to Revise The Canons of Ethics at the mid-winter meeting of the State Bar Association and will write up the report of the committee.

HOME ECONOMICS

Joseph S. Rowland gave the report of the nominating committee at the annual meeting of the Alabama Council on Family Relations in Auburn Feb. 18. He is chairman of that committee, is on the planning committee with Catherine Beasley, and is also president of the Southeastern Council in Family Relations which meeting was held in Savannah, Ga., the latter part of February.

Ernestine Jackson was installed as chairman of the College Teachers of Food and Nutrition in the Southeastern Region, March 1 at the University of Georgia.

SOCIAL WORK

Albert Schaffer talked on sociological aspects in crime causation to the Law School Seminar on Current Criminal Law Problems, Feb. 19.

Charles S. Prigmore, who will be included in the Dictionary of International Biography which will be published in London in October, 1969, has received the certificate of merit awarded by the editorial board of the Dictionary for his "distinguished services as a social worker and educationalist."

HONORS AND PRESENTATIONS

Joseph F. Volker addressed the Engineering Council of Birmingham on February 22 at the Parliament House. His theme was: Engineering, Partner in Rebuilding Urban America. The occasion was a highlight of National Engineers Week.

Dr. Henry H. Hoffman, associate professor of anatomy; American Association for the Advancement of Science, Dallas, Dec. 26-31; presentation, Similarities and Differences in the Forebrain of Representative Anurans.

Dr. John H. Holt, Jr., assistant professor of medicine; 24th annual meeting of the Southern Society for Clinical Investigation, Jan. 30-Feb. 1, New Orleans; presentation, Multiple Dipole Electrocardiography; co-authors included Dr. A. C. L. Barnard, associate professor of biomathematics; Dr. M. S. Lynn, IBM Scientific Center, Houston; and Dr. Harold T. Dodge, professor of medicine and director, Division of Cardiology.

Dr. Sidney L. Miller, associate professor of dentistry, Department of Community Dentistry; appointed to the Dental Education Review Committee of the Bureau of Health Manpower, USPHS, for a one-year term, beginning March 1.

Dr. Robert E. Taylor, Jr., assistant professor of physiology and biophysics; 1st conference on Amphibian Metamorphosis, Wakulla Springs, Fla., Jan. 9-11; presentation on Changes in the Mechanism for Sodium Conservation during Metamorphosis in the Bull-

frog. Dr. Samuel B. Barker, professor of physiology and biophysics and director of graduate studies, co-authored the presentation.

Dr. K. Lemone Yielding, professor of biochemistry and director, Laboratory of Molecular Biology, Southern Society for Clinical Investigation, New Orleans, Jan. 30-Feb. 1; presentation, Drug Inhibition of DNA Repair As a Means of Modifying Resistance of Neoplasma to Alkylating Agents and X-Rays, co-author was Dr. David Gaudin, research associate in Laboratory of Molecular Biology.

STAFF APPOINTMENTS

The former chief of the Dental Research Section of the National Bureau of Standards in Washington, D. C., William T. Sweeney, has joined the School of Dentistry faculty as research associate in dentistry (biomaterials). He will be principally involved with the biomaterials section at the dental school's Regional Maxillofacial Prosthetics Treatment and Training Center. Mr. Sweeney, who spent most of his professional career with the NBS, has been cited on numerous occasions for his many contributions to the science of dental materials. Among the prestigious awards he holds are the Souder Award from the International Association for Dental Research (the highest award given in the world for excellence in dental materials research), 1960; the Silver Medal from the U. S. Department of Commerce, National Bureau of Standards, 1968; the American Dental Association Honor Certificate, 1968; and the American College of Dentists Certificate of Merit, 1966. Sweeney received an A. B. degree in physics from George Washington University in 1927, then completed graduate courses at George Washington University and the NBS.

Don Hamner has been appointed instructor in health physics, Department of Physiology and Biophysics. He earned his B. S. degree in biology at the University of Alabama in 1952, then completed advanced work at the University of Alabama in Birmingham Extension Center (now the College of General Studies). From 1962-63 he served as an Atomic Energy Commission fellow at the University of Kansas. Prior to being appointed to the Medical Center faculty, Hamner held positions with the Pennsylvania Department of Health and the USPHS,

Salt Lake City, and Battelle Northwest Laboratories, Richland, Wash.

Dr. Samuel L. Hollobaugh has joined the Department of Medicine's faculty as assistant professor. He took his pre-medical education at Ohio State University, then earned his medical degree at Ohio State University College of Medicine in 1962. Upon completion of internship and residency training at University Hospital, Columbus, Ohio, Dr. Hollobaugh served there as a research fellow in endocrinology and metabolism. The study of diabetes mellitus is Dr. Hollobaugh's principal research interest.

Dr. Prasertsri Thongngam has been appointed instructor in clinical pathology. Born in Bangkok, Thailand, she earned the M.D. from Chulalongkorn Medical School, University of Medical Sciences, Bangkok, 1959. Dr. Thongngam completed an internship and medicine and pathology residencies at Chulalongkorn University Hospital, 1960-63. Upon coming to the United States in 1964, Dr. Thongngam completed four additional years of residency training in clinical pathology at the University of Alabama Medical Center, having served as chief resident during her final year. Dr. Thongngam, who joined the faculty last July, is a junior member of the American Society of Clinical Pathology.

Dr. Clyde Francis Winzar of Brisbane, Australia, is visiting professor of dentistry, Department of Orthodontics. Dr. Winzar, on sabbatical leave from the University of Queensland Dental College, will serve on the dental faculty here through August 1969.

Dr. Alfred E. Turman has been promoted to assistant professor of urology, Department of Surgery. Prior to joining the faculty, Dr. Turman was a staff urologist with the Southern California Permanente Medical Group (1966-1967). After earning A.B. and M.D. degrees from Vanderbilt University, Dr. Turman completed an internship and residencies (surgery and urology) at Vanderbilt Hospital.

Dr. Leopoldo F. Montes has received an additional appointment as associate professor of microbiology. He joined the Medical College faculty in 1966 as associate professor of dermatology. A native of Buenos Aires, Argentina, Dr. Montes earned his medical degree at the University of Buenos Aires Medical School in 1954. He came to the United States to complete

dermatology training at Pennsylvania Hospital, Philadelphia (1955-56), and the University of Michigan Medical Center (1956-60).

COLLEGE OF GENERAL STUDIES

Albert Ramirez presented a paper at the Southeastern Psychological Association meeting held in New Orleans Feb. 27-March 1. His presentation was entitled Anomia, Political Powerlessness, and Resistance to Fluoridation.

Mrs. Charlotte Gafford is serving on the Silver Bowl Awards Committee of the 1969 Festival of Arts.

John Coley recently spoke to two senior English classes at Berry High School on Chaucer.

George Passey will represent Springfield College at the inauguration of Dr. Kermit Johnson as president of Alabama College in Montevallo on March 25.

John Lewis, Darrell Hankins and Marian Noordam will attend a meeting of the Southwestern Social Sciences Association in Houston April 3-4. Dr. Lewis has been invited to give two seminars for the Civil Service Commission. The first was March 12 in New Orleans and the second is scheduled for March 21 in Atlanta. He has been appointed to the Constitution committee of Beta Gamma Sigma honorary business fraternity and to the committee on taxation of financial institutions of the National Taxation Association.

Harold Wershow, a consultant to the Parent and Child Development Center, will be seen on Channel 13 in a 30-minute documentary now being filmed on the Center's activities. Dr. Wershow gave a slide-illustrated talk on Israel at the Unitarian Church on Cahaba Road March 2. This was one of a two-part series on the Middle East.

Jack D. L. Holmes is listed in the first volume (history) of the 1969 edition of the Directory of American Scholars.

Robert Bauman attended the annual meetings of the American Physical Society and the American Association of Physics Teachers in New York City, Feb. 2-6.

Joseph Appleton and John Lewis are coordi-

nators for a series of 12 weekly three-hour lectures which began Feb. 15 at the Rust Engineering Building. The series is designed to inform some 45 Rust executives about such topics as principles of administrative organization, network analysis and human engineering. Tom Talbot of the CGS faculty will join other lecturers from Alabama and out-of-state in conducting the sessions.

Mrs. Elizabeth Waggoner, who recently completed work for her M.A. degree in occupational therapy at the University of Southern California, joined the College faculty Feb. 1 as assistant professor of occupational therapy. Mrs. Waggoner received her B.S. degree from Ohio State; her duties will include the teaching and implementation of the Community Practice Program funded last year by the Public Health Service. She is the former director of the School of Occupational Therapy at the University of Puget Sound in Tacoma, Washington.

Martha Johnson exhibited some 33 of her drawings, prints, collages, and paintings at the Central Bank Building from March 15-30. Over 250 people attended the Feb. 16 opening of her show at Samford University in February.

Richard Pope, assistant professor of art, had a Brayer Drawing, "1935", accepted in the fourteenth annual Mid-south Exhibition in Memphis, Tennessee.

Samuel P. McManus, associate professor of chemistry, is co-author of a paper which appeared in the December issue of CHEMICAL COMMUNICATIONS. His co-author is Dr. C. U. Pittman, Jr. of the department of chemistry at the Tuscaloosa Campus. Dr. McManus has been elected Chairman of the North Alabama Section of the American Chemical Society for 1969.

Joseph C. Dowdle, professor of electrical engineering and former chairman of Engineering has been appointed executive assistant to H. Clyde Reeves. His responsibilities include

the conducting and development of institutional research and analysis. He will be a member of the Administrative Council and will serve without vote as secretary to the Policy-Program Council.

Dr. Dowdle returned February 1 from sabbatical leave which began August, 1968. He attended the Center for the Study of Higher Education at the University of Michigan as a Visiting Scholar in University Administration.

Rhoda E. Wharry, associate professor of education, lectured and conducted a workshop at Alabama A & M College, February 17-18. The workshop, Learning Characteristics of Disadvantaged Children, was concerned with diagnosis of learning problems and the corresponding teaching procedures.

Reese Danley Kilgo, assistant professor of education, addressed the North Alabama School Superintendents, February 11, on Proposal for a Program of Teacher Education. The second session of Counseling for Changing Times of which Dr. Kilgo is Conference Director was held February 21, Calhoun Jr. College, Decatur. The meeting was held in conjunction with the Alabama Personnel and Guidance Association Districts VIII & IX. She also spoke at the Girl Scout Leaders Conference in Decatur in February on Helping Adolescents Achieve Emotional Maturity. She was a participant in the Communications Conference, Advanced Trainers Section, Episcopal Diocese of Alabama, Feb. 13-16, in Monteagle, Tenn., and also in the Southeast Regional Council Meeting of Planned Parenthood-World Population, held Feb. 26-28, in Jacksonville, Fla.

Oskar Essenwanger, part-time associate professor of earth sciences, was elected to membership in the International Registry of Who's Who. Dr. Essenwanger, chief of the Aerophysics Branch, Physical Sciences Laboratory, Research and Engineering Directorate at the Army Missile Command, has published more than 70 scientific articles, reports, and book reviews in European and American journals. He was a speaker for the Symposium on Meteorological Observations and Instrumentation, held February 10-14, Washington, D. C. His paper was entitled Analytical Procedures for the Quality Control of Meteorological Elements.

J. M. Perreault, director of the library, attended the general sessions of the American Library Association Mid-Winter Meeting and

Frances Cabaniss Roberts Collection

Preferred Citation: Frances Cabaniss Roberts Collection, Archives and Special Collections, M. Louis Salmon Library, University of Alabama in Huntsville, Huntsville, AL.

Collection Scope and Content: The Collection of 114 Linear ft. includes a total of 156 Archival Boxes. The Frances Cabaniss Roberts collection covers the historical records of the Cabaniss Roberts family. This collection contains extensive correspondence records of the Cabaniss Roberts family circa 1830 to 1930.

Archives/Special Collections Access Restrictions: None

Conditions Governing Use: This material may be protected under U. S. Copyright Law (Title 17, U.S. Code) which governs the making of photocopies or reproductions of copyrighted materials. You may use the digitized material for private study, scholarship, or research. Though the University of Alabama in Huntsville Archives and Special Collections has physical ownership of the material in its collections, in some cases we may not own the copyright to the material. It is the patron's obligation to determine and satisfy copyright restrictions when publishing or otherwise distributing materials found in our collections.

Provenance: Gift of Johanna Shields on October 28, 2006.
