

THE VOYAGE MUST CONTINUE.

To be human is to explore. To push the envelope with the best available technology, achieving unexpected breakthroughs. Opening trade routes. Overcoming gravity. Propelling science to one discovery after another. Now modern explorers await the ships that will take them farther: Space Shuttles, re-certified for flight, and more advanced spacecraft for voyages to the planets and beyond. To these goals, near and far term, we dedicate ourselves.

LOCKHEED MARTIN 
We never forget who we're working for™
