NASA Form 26 (Rev. Jan. 1963)

C.S. GCVERHMENT PRINTING OFFICE: 1962 64 - 171845

RIG/January 5, 1967

Additional NASA Marshall Space Flight Center technical specialists have been detailed temporarily to the MSFC office at the North American Aviation Space and Information Systems Division plant at Seal Beach, California, to work more closely with the firm on development and fabrication of the Saturn V second stage (S-II).

Temporary assignment of these specialists was decided upon and the best way to participate with the contractor onsite in overcoming technical problems associated with S-II development.

There is no question of the soundness of the S-II design, however, there have been some problems associated with such things as welding processes and procedures and insulation bonding.

Marshall Center personnel who have gone to the _____, California
North American location include:

Col. Samual Yarchin, S-II Project Manager.

E. D. Mohlere, assistant to the MSFC deputy director, technical.

Franklin E. Williams, S-II project office.

Laurence O. Zuercher, S-II project office.

E. A. Hellebrand, deputy director, Jim Farrow, Harold Goldwater,

He old Smyly, Dick Eilerman, Rick Davis and J. F. Blumrich, all of Propulsion

and Vehicle Engineering Laboratory.

J. P. Orr, and R. C. Littlefield, Manufacturing Engineering Laboratory.

Jack Trott, and J. E. Trader, Quality and Reliability Assurance

Laboratory.

Fritz Weber, Astrionics Laboratory.
