X1.11
X1.14

MONTHLY PROGRESS REPORT

For Period

November 1, 1967, Through November 30, 1967

FOR INTERNAL USE ONLY

HUNTSVILLE, ALABAMA

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

PROPULSION AND VEHICLE ENGINEERING LABORATORY

MPR-P&VE-67-11

MONTHLY PROGRESS REPORT

(November 1, 1967, Through November 30, 1967)

By

Advanced Studies Office
Materials Division
Vehicle Systems Division
Propulsion Division
Structures Division

GEORGE C. MARSHALL SPACE FLIGHT CENTER

TABLE OF CONTENTS

Page

1.	ADVANCED STUDIES OFFICE	1
	Saturn V	1
	Voyager Studies	1
	A. Baseline Spacecraft Design	1
	1. R-P&VE Spacecraft Design Status	1
	2. Spacecraft Structural Analysis	1
	3. Miscellaneous Spacecraft Design Data Compilation	1
	B. Alternate Spacecraft Design Studies	2
	1. 260-inch-diameter Spacecraft Concept	2
	2. Shroud for Voyager-type Payloads	2
	3. Thermal Analyses of Shroud for Mars Missions	2
	C. Program Status Review to Laboratory Management	2
	D. Voyager Missions to Jupiter and Venus	3
	Apollo Applications Program	3
	I. Earth Orbital	3
	A. Dry S-IVB Austere Workshop (Cluster II)	3
	B. Independent Module Study	4
	C. Earth Orbital Thermal Analysis	4
	II. Integration	4
	A. Early Space Station Operational Analysis	4
	B. Experiment Integration Criteria	5
	III. Lunar Systems	5
	MSFC Mobility Test Program	5
	Advanced Programs	6
	I. Launch Vehicles	6
	A. 660k/Nuclear Vehicle Report	6
	B. Liquid Strap-on Pods, "660k Launch Vehicle	6
	C. Stage Design for Personnel Transfer	6
	D. Low-cost Launch Vehicle	7
	E. Saturn Launch Vehicle Upgrading Studies	8
	1. Saturn V SA-520 Definition	8
	2. Saturn IB SA-217 Definition	8
	F. Saturn Utilization Study	8
	G. Saturn Improvement Studies	8
	II. Earth Orbital	9
	A. Common Mission Module	9
	B. Three-burn S-IVB Stage	9
	III. Planetary	9
	A. Probe Module Definition Study	9

TABLE OF CONTENTS (Continued)

	Page
B.	Mars Soft-lander Probe Definition 10
C.	Command Post Definition for Planetary Spacecraft 10
D.	Nuclear Vehicle Design Sensitivity Study 10
2.	MATERIALS DIVISION 11
	Saturn V 11
I.	S-IC Stage 11
A.	Evaluation of Commercial Adhesives 11
1.	Investigation of the Effects of Aging on Polyurethane Adhesive Bond Strength 11
2.	Study of Effects of Additives and Primers on Polyurethane Bond Strength 11
B.	Development and Evaluation of Potting Compounds and Conformal Coatings 12
1.	Development of Epoxysiloxane Embedment Materials 12
2.	Development of Conformal Coatings 13
C.	Investigation of Spring Failures in Hydraulic Engine Actuators 13
D.	Investigation of Spring Failure in the S-IC Stage LOX Prevalve 13
E.	Investigation of the Failure of S-IC Stage Servoactuator Boot Fitting 13
F.	Investigation of Seal Failure in a 6-Inch LOX Fill and Drain Valve 14
II.	Contract Research 14
A.	Polymer Research, Development, and Testing 14
B.	Development of Cryogenic and High Temperature Insulation Material 14
C.	Analytical Methods Development 14
D.	Assessment and Evaluation of Blast Hazards 14
E.	Nondestructive Testing Techniques 14
III.	S-II Stage 14
A.	Investigation of Failure of S-II Stage Interstage Fasteners 14
B.	Evaluation of Foams for Applicability as S-II Liquid Hydrogen Tank Insulation 15

TABLE OF CONTENTS (Continued)

	Page
1. Evaluation of Coatings for Spray Foam Insulation	15
2. Investigation of Surface Preparation Required for Bonding Foam Insulation to the "Mini-Stage"	15
3. Evaluation of the Effects of Heat and Vacuum on CPR-348-3 Foam	16
C. Removal of Corrosion from S-II-F/D Vehicle Tanks	16
D. Developmental Welding	16
E. Development of Standard Nondestructive Techniques for Inspection of Inert Gas Welds of the S-II Stage	16
F. S-II Stage, Project Management, Materials	17
1. Pulsed Arc MIG Welding (PAMIG)	17
2. Liquid Hydrogen Tank Stress Relief Areas	18
3. Weld Cracks at Weld Crossovers	18
4. Spray Foam Insulation	18
IV. S-IVB Stage	19
A. Study of Materials Problems Attendant to the S-IVB Workshop Program	19
1. Study of Flammability of Materials	19
2. Study of the Outgassing Characteristics of Orbital Workshop Materials	20
B. S-IVB Stage, Project Management, Materials	20
1. Korotherm Insulation on S-IVB Stages	20
2. Defective Liquid Hydrogen Tank Insulation	20
3. Stress Corrosion of Belleville Spring	21
4. Reinforcement of Main and Auxiliary Tunnel Clips	21
5. Review of Materials Compatibility in S-IVB Stage Oxygen Systems	21
6. Preparation of Welds for Dye Penetrant Inspection	21
7. Liquid Hydrogen Tank Internal Mounting Brackets	21
8. Evaluation of MD-19 Thermal Control Coating	22
V. F-1 Engine	22
A. Investigation of Insulations for Use on F-1 Engine Components	22
B. F-1 Engine, Project Management, Materials	22
VI. J-2 Engine, Project Management, Materials	23

TABLE OF CONTENTS (Continued)

	Page
VII. Instrument Unit	23
A. Evaluation of Diffusion-Bonded Tube Joints for Use in the Environmental Control System of the Instrument Unit	23
B. Study of Possible Gas Evolution in the Environmental Control System	23
VIII. Apollo Telescope Mount (ATM)	23
A. Investigation of Contamination and Contamination Sources	23
B. Evaluation of Direct Current Motors for Use on ATM	24
C. Investigation of ATM Bearing Lubrication	25
D. Investigation of Thermal Control Materials for the ATM	25
IX. Nuclear Vehicle Technology	25
Advanced Research and Technology	26
I. Contract Research	26
A. Polymer Development and Characterization	26
B. Adhesive Development	26
C. Developmental Welding	26
D. Thermal Control Coatings	26
E. Physical and Mechanical Metallurgy	26
F. Composite Material Development and Testing	26
G. Lubricants and Lubricity	26
H. Corrosion in Aluminum and Steel	27
I. Explosion Hazards and Sensitivity of Fuels	27
J. Synergistic Effects of Nuclear Radiation, Vacuum, and Temperature on Materials	27
K. Instrument Development	27
II. General - In-House	27
A. Development of High Temperature Resistant Polymers	27
B. Development and Characterization of Phosphonitrilic Polymers	28
C. Development of Fluorinated Adhesives	29
D. Developmental and Evaluation of Metallic Composites	29
E. Investigation of Stress Corrosion Characteristics of Various Alloys	30
F. Investigation of Thin Film Dielectrics	32

TABLE OF CONTENTS (Continued)

	Page
G. Development and Evaluation of Techniques for Nondestructively Determining Lack of Penetration in an Aluminum Alloy Weldment	32
H. Development and Evaluation of Materials for Electrical Contacts in Vacuum	33
1. Development of Electrical Brush Materials	33
2. Evaluation of Brush Materials	33
I. Development of Low Density Ceramic Foams	34
J. Literature Survey	34
Monthly Production Report	36
I. Radiography	36
II. Photography	36
III. Metallurgical and Metallographic Testing and Evaluation.	36
IV. Spectrographic Analyses	38
V. Infrared Analyses	38
VI. Chemical Analyses	38
VII. Physico Chemical Analyses	39
VIII. Rubber and Plastics	39
IX. Electroplating and Surface Treatment	39
X. Development Shop Production	39
XI. Materials Evaluated for LOX Sensitivity.	40
XII. Publications	40
3. VEHICLE SYSTEMS DIVISION	43
Saturn IB	43
I. S-IB Stage	43
Cable Installation Review	43
II. Instrument Unit (IU)	43
Engineering Change Proposal (ECP)	43
III. General	43
A. Technical Checklist	43
B. Program Specifications	43
C. Technical Information Summary	43
D. Weight Status Reports	44
E. Mass Characteristics	44
Saturn V	44
I. S-IC Stage	44
A. Ordnance Bonding Problems.	44
B. Aft Umbilical/Tail Service Mast (TSM) Test.	44
C. Stage Umbilical Hardware	44
D. S-IC Hydraulic Supply and Checkout Unit (HSCU)	45

TABLE OF CONTENTS (Continued)

	Page
E. Inert Prefill Unit (IPU)	45
F. Test Specifications and Criteria	45
G. Qualification Test Procedure	46
H. Engineering Change Proposal (ECP)	46
I. Integration Test Requirements Specifications	46
II. S-II Stage	47
A. S-II Pneumatic Console Set (S7-41)	47
B. Insulation Purge Pneumatic Control Console (S7-45).	47
III. S-IVB Stage.	48
A. Pneumatic Console	48
B. Electrical Housing Purge	48
C. Deletion of the 436 Console	48
IV. General	48
A. Vehicle Assembly Documentation	48
B. J-2 Engine LO ₂ Pump Seal Bleed Overboard Drain.	49
C. Damping, Retract, and Reconnect System (DRRS)	49
D. Cable Installation Specifications	49
E. Cable Installation Test Program.	49
F. Weight Status Reports	49
G. Mass Characteristics	49
Advanced Technology	50
I. Systems Design	50
A. Cluster Documentation	50
B. Apollo Telescope Mount (ATM) Documentation	51
C. Nuclear Ground Test Module (NGTM) Testing	53
II. Systems Operations	53
A. Apollo Telescope Mount (ATM) Mechanical Ground Support Equipment (MGSE)	53
B. Cluster/Operations Analysis	53
C. Automatic Umbilical Reconnect System	54
III. Systems Engineering.	54
A. Orbital Workshop (OWS) Simulation.	54
B. Lunar Module (LM)/Apollo Telescope Mount (ATM) Mockups	55
C. Multiple Docking Adapter (MDA) Mockups and Reviews	55
D. Human Factors Experiments	56
E. Contract Activities	57
F. Weight Status Report	58
IV. Systems Requirements	58
Test Plans and Specifications	58
