

Saturn

26 January 1960

MEMORANDUM to Mr. Horner:

In connection with our efforts to speed up the super booster program, I want to recall to you our discussion about the possibility of anticipating the availability of additional funding on Saturn. Assuming that we cannot get new money, either the extended amount or the regular amount for FY 61, before 1 July, what action can be taken to anticipate a steady growth in the acceleration of this program? I am willing to gamble up to some point on advance funding by diverting funds from other programs. Unless we do this, it seems to me that we will be moving forward in a series of stop functions rather than on a smoothly ascending curve of expenditures.
