

HISTORICAL PROFILE

NORTH AMERICAN AVIATION, INC.

June 1962

North American Aviation was founded more than three decades ago. Today it is engaged in a scope of activities ranging from research and development of weapon and space systems for the Department of Defense and the National Aeronautics and Space Administration to the peaceful applications of nuclear energy. From a modest beginning—to the stature of an aerospace leader—that is North American's history. And this is a profile of that history... a sequential summary of the milestones which have marked and secured the corporation's growth and success.
