Mr. David L. Christensen
Research Institute
University of Alabama
Huntsville, Alabama 35807

Dear Sir:

SUBJECT: Technical paper entitled "Start Transient Investigation of the Rocketdyne J-2 Engine at Simulated Altitude Conditions"

The subject paper, a copy of which you requested in your letter of March 10, was never prepared. The abstract for this paper was not accepted for presentation at an AIAA conference and, therefore, the paper was not completed. However, considerable J-2 engine start transient testing was accomplished in Test Cell J-4 between July 1966 and October 1968 and has been documented in AEDC technical reports. A bibliography of all of the AEDC J-2 engine test reports is attached. Copies of these reports were transmitted to Mr. T. P. Smith, J-2 Project Manager, Engine Program Office, Marshall Space Flight Center, or copies may also be obtained from Defense Documentation Center, Cameron Station, Alexandria, Virginia 22314.

If we can furnish further assistance, please feel free to contact us.

Sincerely,

James Neely
James Neely, Manager
Projects Branch
Large Rocket Facility
