COMPLETE VOLUME CONTROL

The best in band organ music at any volume from a whisper to a shout.

Equipped with a 40 watt power amplifier and two or four 30 watt speakers, this instrument will adequately cover a large carnival area at volumes exceeding that of a large band organ. Or if your operation is near a residential area the volume can be reduced to any desired level.

Fully automatic, this continuous tape player will handle taped programs up to 8 hours in length before automatically repeating, thereby eliminating changing of rolls and the attendant deterioration of music. It eliminates the need for a large expensive library of music.

The Heart of the Davis Electronic Band Organ

PRESTO PB-17B TAPE RECORDER

World-famous, the Presto PB-17B continuous tape reproducer is used exclusively by Muzak. It is also in constant use at Disneyland, and major railroads and airlines. This mechanism accommodates up to 14" reels playing 4 hours in each direction, giving 8 hours playing time before automatically repeating. Reversing is accomplished by foil strips attached to each end of tape.

FEATURES

A completely self-contained, fully automatic electronic band organ designed for continuous trouble-free operation. This instrument will faithfully reproduce with high fidelity at any desired volume the authentic sounds of a band organ. With our tapes you can have the music of a Wurlitzer 165 without the attendant maintenance trouble of a band organ.

MECHANICAL SPECIFICATIONS

Tape Speed: $3\frac{3}{4}$ ips
Reel Size: 14 in. maximum
Tape Capacity (standard tape): 4800 feet
Number of Tracks: Two
Frequency Response: 50 to 8000 cps.
Playing Time: 8 hours, continuous
Panel Size of PB17B: 19" x 24 $\frac{1}{2}$ "
Power Required: 150 watts at 115 volts, 60 cycles.

ELECTRICAL SPECIFICATIONS

Preamplifier Output (max.): +18 dbm at 600 ohms using T-161 plug-in transformer or 30 volts, high impedance
Output impedance: 10,000 ohms, cathode follower. Use T-161 plug-in transformer for 600 ohm output.
Controls: Volume and on-off switch. Screwdriver-adjust tone equalization control also provided.
Panel Size: 19" x 3 $\frac{1}{2}$ " x 6 $\frac{1}{2}$ "
Power Required: 30 watts at 115 volts, 60 cycles.
