"LITTLE TOOT" CAR AND TENDER TRUCKS

These are the easiest pulling trucks we have ever seen. The 6" wheels are special chilled wheel iron for long wear. Every wheel turns individually on Timken bearings. The "dead axle" with wheels turning individually reduces wheel wear and reduces power required to pull the car. Each truck is supported on eight rubber cushions to give a comfortable, quiet ride and allows wheels to follow minor bumps or low joints and eliminates "three wheeling." Heavily constructed to carry a ton or more per truck. Horizontal King Pin permits truck to rock on uneven track. Greasing needed only once a week. Readily adaptable for replacement trucks on existing cars.

PRICES

Standard Sizes:

15" gauge	\$125.00 per truck
24" gauge	\$145.00 per truck

Special Sizes:

12" - 14" - 16"	\$140.00 per truck
