

Super Jet Plane Ride

... Patent Rights Reserved ...

THESE LARGE PLANES OPERATE AND SOUND LIKE REAL JETS
THEY ARE JET PROPELLED

Each plane has power unit to develop the powerful thrust and sound of a real jet in flight. Speed of the ride is controlled by shutting off motors as desired. **Planes equipped with 4 buttons which activate "Electric Guns."** Stationary diameter of the ride is 20 feet. Planes swing out to 32 feet in action. When stationary, planes are low to the ground for self loading and unloading. Capacity 20 large children --- all ages can ride --- spacious planes will permit parents to ride with children. Heavy duty construction. Entire weight of the ride is supported and turns on big capacity timken bearings. Weight of each plane approximately 200 pounds --- Length of planes approx. 85 inches --- Diameter of planes approximately 30 inches --- Width at air scoops 40 inches. Motors and lights require approx. 1500 watts, 110 volt A. C. single phase electric current. Shipping weight of entire ride approx. 4000 pounds. Very portable --- Requires only a few minutes to assemble or disassemble and can be hauled on a 14 foot truck. Priced at only \$3575.00 F. O. B. Factory.
