Re: SPACE CITY, U.S.A.

Dear Hubert:

I received your letter of October 18, 1966 and all I can say is you are right, we had "better get going".

I am enclosing a brochure on Space City, together with map of Space City and Offering Circular which you requested that I forward to you.

The Stage Stop in Lafayette has done a fairly good business since its opening, however, there have been so many improvements that needed to be made that all plans and specifications have been redrawn and I expect to receive a complete set by the end of this week. I will also have construction costs by this date. As soon as possible I will forward to you a set of plans.

In September I found to my dismay that I had spent too much time on the Stage Stop project and was so far behind in my law work both financially and detail work that I have had to keep my nose to the grindstone getting myself back in a more promising position.

I am happy to learn that you have a prospective group interested in going along with you and I hope that they will be able to make it a success.

In the event your group does not work out I will be happy to take time off and make that trip to California and visit with Dale Robertson.

The most important thing as far as Dale Robertson is concerned with at

Mr. H. R. Mitchell

page -2-

the present time is that the Stage Stop make some real progress. He knows that we only have the Lafayette Stage Stop and he must be disappointed that more have not been built.

We feel that by January other Stage Stops will be either built or at least started.

I wish you could find out from Mrs. Edward Tweddell her prognostications on what she thinks our venture will accomplish.

Thanks for the invitation to come visit you but must stick with the law practice at the present time.

With very best regards, I am

Very truly yours,

Marion
