

These 3/5 scale 1906 Maxwell and 1910 Ford cars are authentic to the finest detail. They are powered by Koehler K90, 4 hp. gas motors with a single pedal control and can be driven by kids from 8 to 80.

Arrow antique cars are ruggedly designed. They can be used as separate units of a free-way ride or adapted for use on Arrow's captive control 24-volt electric track . . . extremely effective, too, in parades or for advertising purposes.
